1. What is the final title of your project?

The final title of the project is Cyber Rent.

2. What is the problem statement of your project?

If someone doesn't have an item that is easily accessible to them, they can rent an item at a discounted rate.

They can rent the item for any amount of time and at the renter's convenience. It supports both sides, it gives them the chance to communicate or connect with others to easily rent items.

3. Who are the potential stakeholders of your project?

The potential stakeholders would be college students who would have a hard time finding or buying items that they might need. The age 18 and up.

4. What is this project's scope (boundaries, what is in and out)?

There has to be a page for:

- Renting out/listing a product
- Payment (checkout)
- Terms and conditions
- Items for rent - reviews under (for person and product - if previously rented) - designated link/pop-up for cars (proof of age -ID)
- Home page - zip code/town, title of the website, an introduction to the website, a number to call.
- Chat (lower corner) (pop-up box)

Boundaries- Apartments, houses, condos, any housing

If someone is renting out an item, the price has to be verified and there has to be proof of ownership. It has to be verified by the website before posting it.

The payment system can be an online payment system. Apple pay, credit or debit cards,

The payment is on hold until proof of getting the item.

Limit it to the area that you are residing in.

Age requirements - You have to be 18 and up to rent any item. For cars, you have to be 21 +.

You have to have a valid ID in order to get the item.

Any damages that are inflicted upon the item, the consumer has to pay back.

Depending on the project, there can be shipping, but there will be a fee that is included in the price.
